Tom,

I have yet to hear back from EPA on data assessment methods and our request for sediment sampling.

I NEED TO KNOW the assessment methods or I cannot evaluate our data in a cohesive fashion. If I asses differently, we will have greater confusion.

Please talk to Joyel or whomever controls theis information. I will have data back from Green

analytical this evening.

Subject: RE: Response update website

Thanks Kathi,

Southern Ute is NOT mentioned by EPA on this website in the **Which Other Organizations are Involved in the Response?** section

<http://www2.epa.gov/goldkingmine/roles-epa-and-other-responders-after-2015-gold-king-mine-release>

SUIT WQP is conducting the following

- [REDACTED] Attached is the updated SUIT Water Quality Program Daily Monitoring Plan for the Sill Response. 4 locations on the Reservation are monitored daily.
- [REDACTED] Initial water quality data from the lab should be received by WQP staff this evening/tomorrow am.
- [REDACTED] WQP staff are out with EPA contractor now to assess Tribal drinking water wells.
- [REDACTED] WQP will present initial field data of pH trends during the plume at tonight's meeting.
- [REDACTED] Meeting with EPA/CDPHE this afternoon to determine most appropriate assessment statistics. I have requested EPA assessment methods and have not yet received a response. Ensuring all data are analyzed the same is critical.

Please contact me with any questions.
